APS MANTARAY DIVE FINS

These fins are incredible! I dove a pair in Rockport and couldn't believe the power and comfort they afforded! Featuring a patented high-tech Dual- Directional Water Channeling System, these gnarly fins come in White Lightning, Aqua Blue, Caribbean Blue and Phantom Black. The unique design is shorter, lighter and faster, making them ideal for any type of diving.

The perfect traveling fin, they provide excellent control on wrecks with a superb tight turning capability. The Mantarays are low silting, deliver incredible power for their size, and are semi-neutral to positively buoyant. You won't even need to take them off when coming up the ladder from your dive!

They also feature a unique Universal Strap which can also be used on many existing quick release buckled fins that use the strap-post system.
